

# WHAT'S INSIDE SPACE ROCKS?

**Drawing of meteorite cut in half:**

Features	Represented by	Tick what you find
Ablation crust	chocolate coating	
Rocky	rice bubbles	
Chondrules	clinkers	
Olivine crystals	jelly lollies	
Iron	plain chocolate	

**My meteorite is a**

## Play dough

### Ingredients

- 2 cups plain flour
- 2 cups warm water
- 1 cup salt
- 2 tbs cooking oil
- 1 tbs cream of tartar
- food colour

### Method

1. Mix all ingredients in medium saucepan.
2. Warm over low heat and stir continuously.
3. Keep stirring until mixture forms a dough and comes away from the sides. If not cooked long enough, the playdough will be sticky, so don't give up early!
4. Tip dough out onto workbench, allow to cool
5. When dough is ok to touch, add a few drops of food colour and knead through.

**(makes about 600g playdough, enough for 30 meteorites)**
